- American Association of Critical Care Nurses
- Women In Healthcare
- American Nurses Association

Why do you feel that you are the best candidate for this office?

As a committee member, I would share 29 years of expertise in a broad range of nursing topics related to quality, safety, and regulatory standards for clinical nursing. My contributions to PSNA would be a global-thinking perspective developed from affiliations with several professional organizations.

Although new to PSNA, I have familiarized myself with the bylaws and can demonstrate a history of leadership and success with consensus-building and directing initiatives that support the advancement of the nursing profession.

How do you plan on helping PSNA meet its mission to lead, advocate, educate, and connect with registered nurses across the Commonwealth?

My passion is the blend of Nursing, Quality, and the Patient's Experience, and how this impacts policy and strategic planning within large health systems. I would support PSNA's initiatives by sharing my ideas and experiences, while collaborating with my team.
